ZKTime Small Business

Time & Attendance and Access Control Management
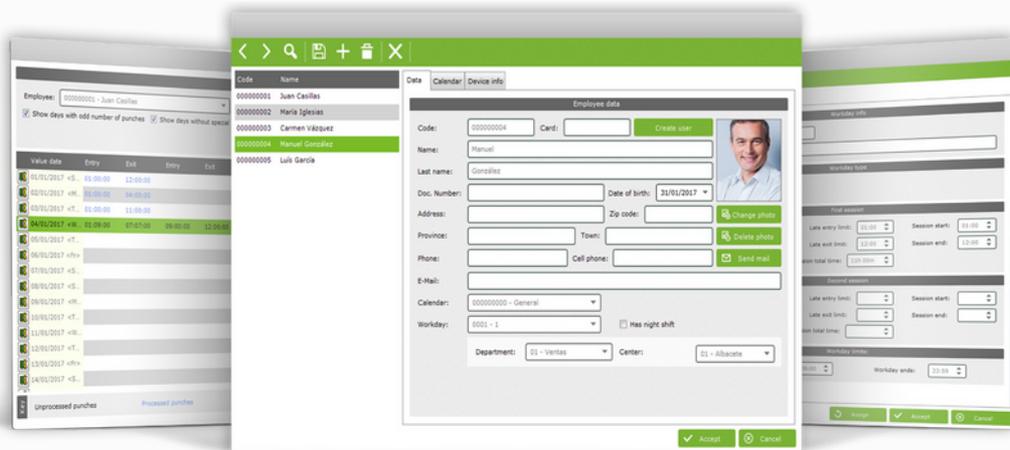

ZKTime Small Business is an user-friendly software application that monitors the time and attendance of your employees. This software allows you to calculate your employees' worked hours by selected periods.

ZKTime Small Business also monitors access control. With this application you can define different access hours and days per employee. All the information can be printed but also exported to Excel, Word, PDF and other formats.

Features

- Avoids all manual work from the payroll process.

- Calculates employees' worked hours as well as stores all the access data.

- Allows to see and print different reports such as: attendance and access logs or activity time reports

- Enables to define up to 10.000 events (healthcare, personal business, somke time...)

- Shows and prints comprehensive reports: attendance reports, activity time reports, total activity time reports between periods, access reports...

- Data Export to Word, Excel, PDF, Text and HTML formats

- Supports SQL Server, MySQL and Oracle databases

- Multi-language (Spanish, English, Portuguese, French and Italian)
